SUMMARY

Informatics Management student at Astra Polytechnic (Class of 2023) with a strong passion for software and game development. Experienced in project management, web application development, and full-stack fundamentals. Currently serving as Head of the Education Department in the Informatics Management Student Association, leading academic initiatives and developing teamwork, communication, and leadership skills. Aspires to become a professional game developer contributing to Indonesia’s creative and gaming industry on a global scale.

EDUCATION

Associate Degree in Informatics Management – GPA 3.53 Aug 2023 - Present
Activities: Informatics Management Student Association (Head of Education Department), Programming Study Group, Mini Project Development Team
Focused on software development, IT project management, and system analysis.
Worked on practical projects including hotel management, housing marketing, and web/mobile-based overtime submission systems.

EXPERIENCE

Technical Support, Chitato Crunch “Lead the Wave” Event Aug 2025
Responsible for managing and maintaining digital devices such as touchscreen TVs, game systems, and microphones. Ensured all equipment operated optimally and performed quick troubleshooting when technical issues occurred to support smooth event operations.

Technical Support, VEEV Sampoerna Photo Booth Sep 2024
Performed maintenance and monitoring of camera devices throughout the event. Responsible for ensuring all cameras functioned properly, checking connectivity and configuration, and handling technical issues to maintain smooth operations at the interactive booth.

Technical Support, Outside BFF Game Machine Event Apr - Aug 2023
Delivered on-site technical support for the OATSIDE BFF interactive game machine. Managed system performance, motion-sensing cameras, and the automated milk vending system to ensure stable operation. Troubleshot technical issues in real time, maintaining smooth and engaging gameplay experiences for participants.

Full-stack Developer, PT Konekthing Benda Pintar Aug - Nov 2022
Developed a web-based CV builder using Codelgniter, consisting of two main pages: a public CV display and a CMS for managing content. The system allows users to edit sections like experience, education, and skills, with features such as authentication and responsive design.

PROJECTS

Employee Mobile App – GS Track Apr - Nov 2025
Built an internal mobile app for GS Battery employees using React Native and Spring Boot, featuring attendance, leave requests, and medical reimbursements. Improved UI/UX and optimized API integration for stable system communication.

Maintenance of BOM Accessories System – Astra Honda Motor Mar - Jul 2025
Responsible for migrating and maintaining features on Astra Honda Motor’s internal AHMAS system. Managed Bill of Materials (BOM) data for vehicle accessories, ensured smooth integration between frontend and Spring Boot backend, and supported enterprise workflows and production system validation.

Employee Overtime Request Application – AstraTech Oct - Dec 2024
Developed an employee overtime request system featuring approval workflows, request history tracking, and automated email notifications. Simulated realistic HR workflow processes and focused on improving internal administrative efficiency.

ORGANIZATIONS

Head of Education Department — Student Association of Informatics Management (2024–2025)

As Head of the Education Department, I led a team focused on enhancing academic quality and student competencies. Responsible for designing, organizing, and overseeing various educational programs, including trainings, workshops, and internal project development.

Education Department Staff — Student Association of Informatics Management (2023–2024)

As a staff member of the Education Department, I supported academic activities and skill development for Informatics Management students. My main focus was helping junior students understand programming fundamentals and IT concepts through study sessions and guided mini-projects.
